EDUCATION

UCF Coding Boot Camp - Orlando, FL
Certificate of Completion (July 2022)

PROJECTS

Budge-It (Group Project)
- Developed a **full stack** application using **Handlebars, CSS,** and **JavaScript** to display user data.
- Stored customer data by using a **Sequelize** database.
- Used **user authentication** in order to verify the information that the user signed up with.
- The user has the ability to **manage income and expenses** through **routes and handlebars.**
- Incomes and expenses are changed using **modals**.
- Developed a **RESTful Node.js** backend server using **Express.js and MySQL** to edit and retrieve customer data.

Photo Port (React)
- Developed a **React** front-end using **HTML**, **CSS**, and **JavaScript** to display work and experience for a photographer in need of more clients.
- Ran **unit tests** using the **React testing library.**
- Added **conditional rendering** to the **gallery component**.
- Added a contact form, controlled **state** with a **controlled component.**

Tech Blog (Full Stack)
- The front end of this project was created using **Handlebars, Bootstrap, and CSS.**
- Created a **home page view**, as well as a **dashboard** and **login page.**
- Follows a **MVC (model, view, controller)** approach to building this project.
- Added a **comment functionality** so users can express their thoughts on other users posts.

EXPERIENCE

Travel & Leisure - Orlando, FL
Business Operations (December 2021 – March 2022)
- Conducted routine maintenance on servers and systems, keeping networks fully operational during peak periods.
- Oversaw company operations, customer service, and resource management.
- Troubleshot daily IT desktop client issues, supporting multiple departments and various offices.
- Demonstrated excellent network and relationship building with both external and internal customers.
- Produced accurate and detailed daily reports for processing and measuring progress.

There's obviously a lot of white space here, meaning you could fill the resume with more stuff. Just make sure it meaningfully relates to the requirements for a tech job. This could include:

- *More details on your projects*
- *Any special educational awards or accolades you've received*
- *Job details that highlight delivering results, working independently, solving problems, etc.*
- *Volunteer positions that demonstrate the same things*

Use the full page, but don't "pad" your resume! It's very easy to tell which accomplishments are meaningful to the position and which are just taking up space!
